

Helping Hands

Software Developer

For More Information:
<https://www.helpinghandsapp.com/jointeam.html>

Description

- Use React and Ruby on Rails to interface with the backend.
- Use Rails code to interface with the database and provide information to users.
- Work on developing an iOS/Android app from the ground up.
- Connect app to server and interface with api.
- Provide support on production issues as needed.
- Working on development and enhancement of front end to support new features as requested by team or end users.
- Working on adding and enhancing functionality of the platform that matches youth to volunteer positions in the community used by various marginalized populations- newcomer and refugee youth, youth who have not previously been employed and for whom this would be their first job experience, Youth with Disabilities, Youth who have not completed high School, Visible minorities and LGBTQ2 youth. This includes database changes to support functionality.

(Dates/Times):

A minimum of five-week commitment is required, with a minimum of 10 hours of volunteering per week. Volunteers can wish to work more than the specified time frame if they wish.
